 Status	Done
 Task type	

## Walky Admin Portal — Sprinternship Project

 **Timeline:** 3 weeks |  **Team:** 5 frontend developers |  **Company:** Walky

 *Built a fully functional admin portal in 3 weeks, connecting frontend to backend and ensuring mobile-first responsive design.*

*(All screenshots are sanitized to remove sensitive information.)*

## My Role & Contributions

### Authentication & User Flow

- Implemented **Sign-In** with password toggle, error handling, and backend integration.
- Built **Forgot Password**: email input → verification code → reset password.
- Connected frontend to backend authentication for real account login/logout.

### Core UI Components

- Designed and implemented **Topbar** with functional hamburger menu.
- Created **Info Stat Cards** for Students page and connected them to live backend data.

- Integrated Students table with database for real-time updates.
- Connected Engagement page widgets to backend data (removed hardcoded placeholders).

### Responsive Design

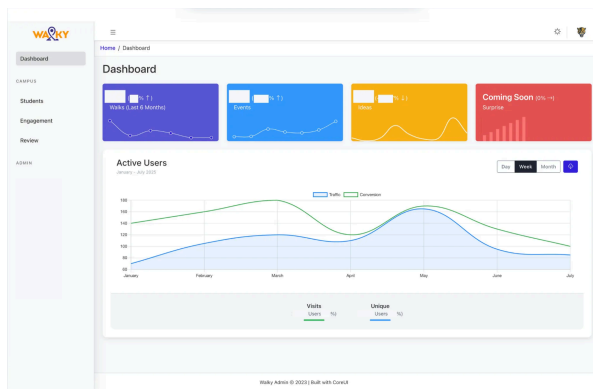

- Optimized layouts for **mobile & desktop** for a seamless experience.
- Improved visual consistency and usability.

## Key Features I Implemented

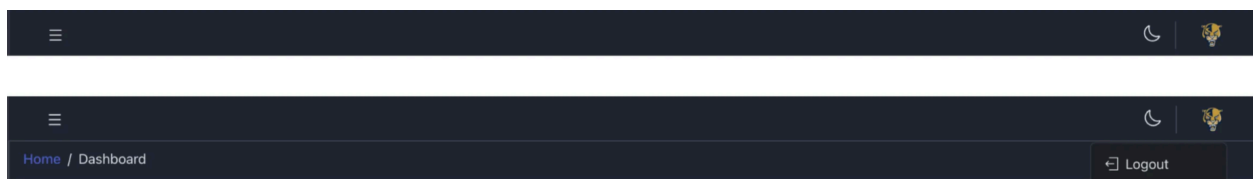

Feature	Description	Impact
<b>Sign-In Page</b>	Password toggle, invalid credential handling, backend connection	✅ Improved security & UX
<b>Forgot Password Flow</b>	Email → Code → Reset password	🔄 Secure account recovery
<b>Topbar &amp; Logout</b>	Responsive topbar, hamburger menu, logout	📱 Better navigation
<b>Students Page</b>	Dynamic info stat cards & database table	📊 Real-time data
<b>Engagement Page</b>	Live backend data for all widgets	🎯 Accurate reporting
<b>Responsive UI</b>	Mobile & desktop optimization	🌐 Consistent experience

## Screenshots (Sanitized)

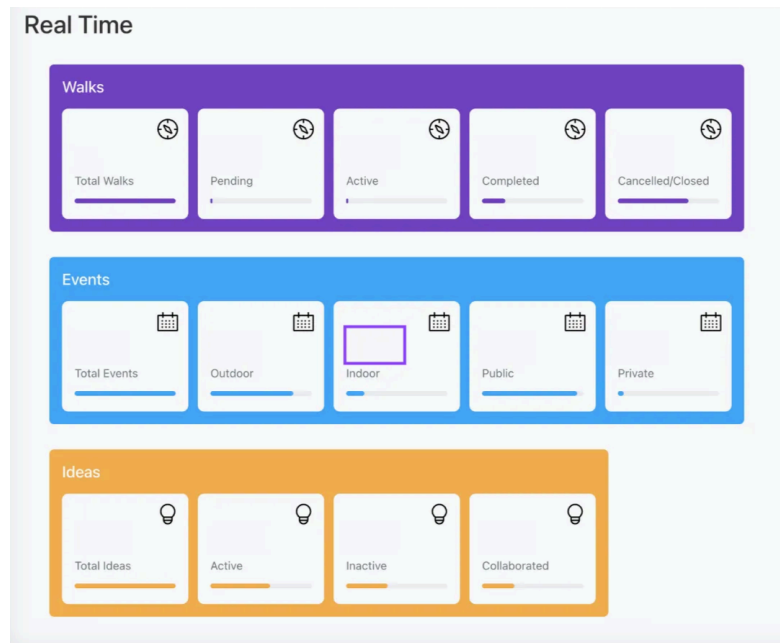

- **Dashboard Page** - Dark and Light mode

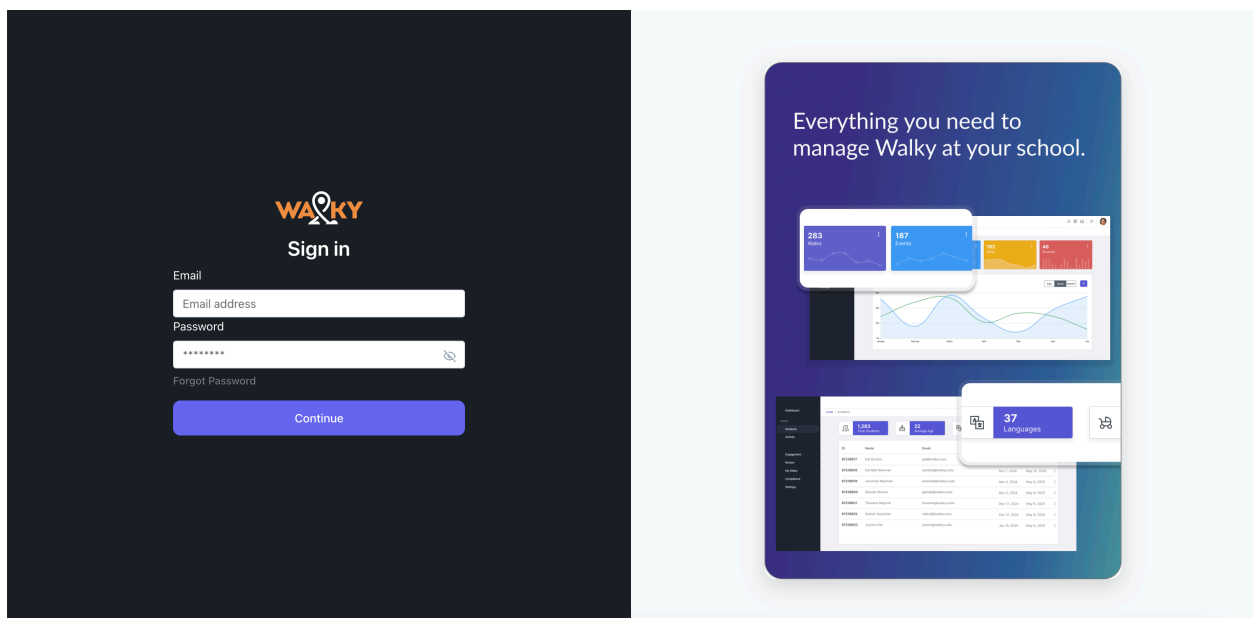

- **Topbar** - Hamburger button toggle and Logout capabilities

	<div>Total Students</div>		<div>Average Age</div>		<div>Languages</div>		<div>Parents</div>
ID	Name	Email	<div>The number of different spoken languages</div>	Joined	Last Update		

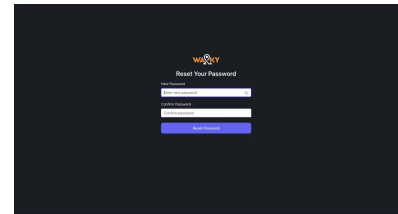

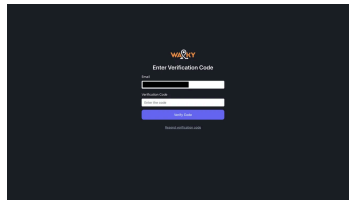

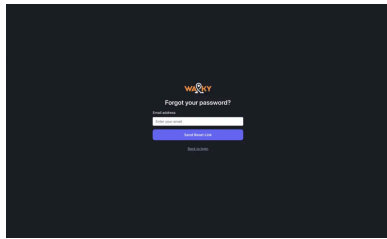

- **Students Page** — Stat cards & table (*content anonymized*)

- **Engagement Page** — Live data widgets (*no sensitive info*)

- **Login Page** — Password toggle & error states (*data removed*)

- **Forgot Password** - Flow for creating a new password

## Tech Stack

**Frontend:** React, CoreUI, CSS

**Backend Integration:** Axios, REST APIs

**Tools:** Jira, GitHub, Figma

**Version Control:** Git
